

IS-J1018

Precision is
our business

APPLICATION

CMS – Ing. Dr. Schreder offers a wide range of integrating spheres in the raw sphere shape. Prototyping as well as series production demands are well satisfied with this system. The standard diameters available are ranging from 30 mm up to 500 mm. Other diameters are available on request. A robust orbit flange on both sides of the two hemispheres allows a precise fitting, an additional clamp for connection is not necessary.

SPECIFICATION

Specified Wavelength	UV to IR (depending on the coating reflectance product)
Coating internal	no, available on request
Paint exterior	no, available on request
Sphere bench	no, available on request

Physical data

Weight	0.5 kg (diameter 200 mm)
Diameter standard	30 mm up to 500 mm
Material	aluminium
