

KS- J1011-ADAPT-BREW

Precision is
our business

APPLICATION

The KS-J1011-ADAPT-BREW allows attaching the portable field calibrator KS-J1011 to the Brewer spectrophotometer. It is a special baffle and distance adaptor that needs no additional alignment work.

The adaptor is based on a development by the World Radiation Centre (WRC) in Davos/Switzerland. Calibrations in vertical alignments can be performed.

A white curtain blocks environmental radiation from the surrounding. With this also calibration outdoors during the day is possible.

SPECIFICATION

Measurement type	spectral irradiance
Wavelength range	250 nm – 2500 nm
Lamp	200 W / 6.3 A
Baffles	aluminium
Curtain	black out curtain

Physical data

Weight	2.5 kg
Size	dia 180 mm, length 305 mm
Flange	anodised aluminium
