

SP- J1012-HOLDER-LILEI

Precision is
our business

APPLICATION

CMS has available 2 types of holders which connects the light guide to a Bentham type input slit. This guarantees a high flexibility and reliability when the light guide has to be removed. The 2 types differ only in the allowed diameter of the light guide bundle (\varnothing 25 mm, \varnothing 17 mm),

The holder consists of 2 parts. One has to be mounted to the slit, the second one has to be mounted to the light guide. Light guide and slit can afterwards be connected by a strong spring, which guarantees in combination with 2 fitting pins the correct positioning.

SPECIFICATION

Specified slit Bentham type

Physical data

Weight	0.16 kg
Size	88 mm x 46 mm x 19 mm
Material	anodised aluminium
Fitting pins	high-grade-steel
